# SCHINDLER AHEAD LOGBOOK
DIGITALLY STORED.
WELL ORGANIZED.

Schindler Ahead LogBook is the digital document repository to ease the handling of building equipment documents. Having one central place to compile technical and legal documents or user guides ends the need for exhaustive searches and paper copies. Everything is digital, well-structured and accessible from any device. The web-based system also allows file sharing with residents and partners. Paperless and stressless.
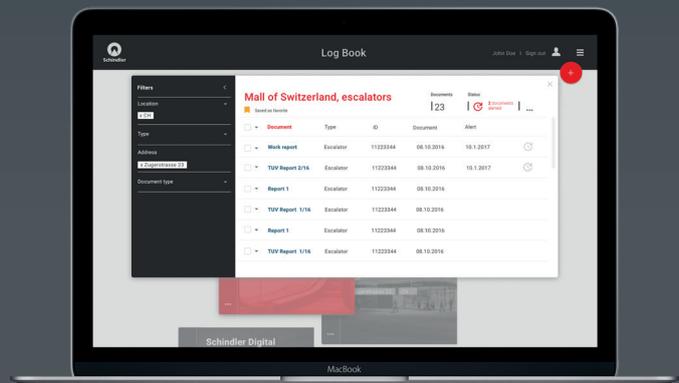

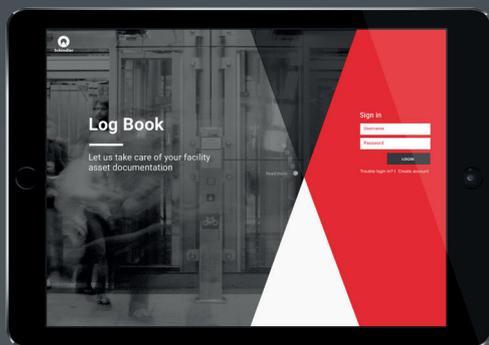

A-Z – IT'S ALL INCLUDED

Meet the obligations and needs of stakeholders with a click. Schindler Ahead LogBook is designed to store all documents from the first sketches of a new construction to manuals for built-in equipment. All documents are digital, traceable and sortable in line with your needs. Set up a network for document sharing, editing and the handover between different suppliers or new building managers. Stop digging for documents and simply find them.

FOR ALL APPLICATIONS

Schindler Ahead LogBook is for all building managers. Whether you operate buildings with or without elevators, you will benefit from all the document management features and a structure that suits your way of working.

SCHINDLER AHEAD LOGBOOK

FEATURES

Metadata search
All documents are tagged when uploaded. Obtain the right document with Schindler Ahead LogBook's smart search engine. Cloud-based, always accessible and open to connect with other building software make it a powerful tool, so you stay organized.

Platform to network
Access the LogBook from your desktop PC or mobile device. Register your partners and grant different levels of access. It's easy to organize a review with a notified body. Residents will also be happier as they now know where to find all the manuals that they probably need only once a year.

Compiled for your needs
Search and compile documents according to application, location, floor, regular checks – just as it makes most sense to you. Grant stakeholders access to the collections they need for their work. You can even set reminders for recurring events or checks.

Full support assured
If you own a vast collection of paper documents, Schindler is at your side to digitize it and even check the consistency of all elevator and escalator related documents.
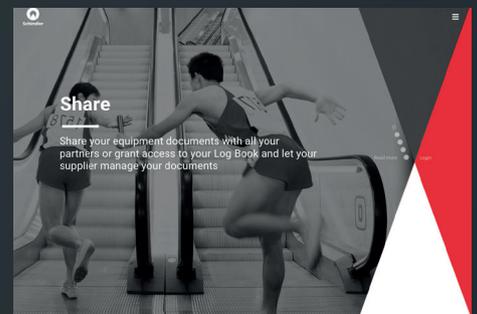

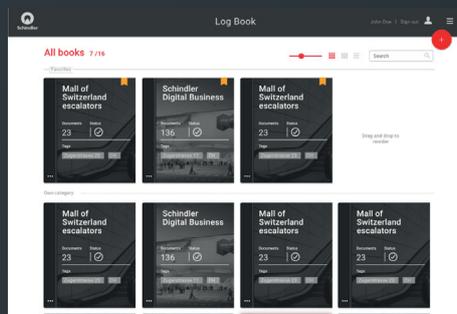

BENEFITS

Structured
The digital repository follows your rules and needs. Just click to collate and share with partners.

Accessible
Powered by the Ahead Cube and secured by the GE Predix cloud, the system is accessible from any desktop or mobile device.

Transparent
Circulate official documents, invoices and work-logs with residents quickly and paper-free.

SCHINDLER AHEAD.
SMART URBAN MOBILITY.
